Education

B.S. Geological Sciences, Hydrogeology/Environmental Geology

August 2011

The University of Texas at Austin
Jackson School of Geosciences

B.A. College of Liberal Arts, Anthropology

December 2010

The University of Texas at Austin

Relevant Work Experience

Mother/Homeschooler, Professional Racquetball Player

December 2016-Current

Self, Midland, TX

Protecting my child during COVID created a new opportunity for learning patience and humility becoming a teacher while pursuing my dream of playing racquetball professionally and creating a new, fearless, adaptable, resilient, powerful version of myself that my son can be proud of. I believe the time has come for me to step back into the workplace to use these new experiences towards a career that will create growth in the field of hydrogeology. I'm excited to see where this path leads.

Hydrogeologist

October 2014–December 2016

Ralph H. Lang, Jr. and Associates, Midland, TX

Researching hydrogeology in FRAC locations to place water wells by interpreting wire line logs and using RRC and TWDB resources and existing water well data, water supply well drilling supervision and logging, pump testing, and reporting using Google Earth, Strater 4, and MS Office applications.

Geologist I

May 2012 – April 2014

ARCADIS U.S., Inc., Midland, TX

Chevron desalination EDR system data management using MS Access, water well drilling supervision, logging, plugging, developing, testing, surveying, and reporting, Phase II ESA logging shallow Geoprobe borings and reporting, private water well drilling supervision and logging, low-flow purge sampling, HydraSleeve sampling, underground storage tank removal supervision and soil sampling with site mapping, Phase I ESA site reconnaissance and reporting, Post Construction Avian Mortality Monitoring surveys and reporting for an Exelon Wind Farm. ExxonMobil LNAPL mobility dye tracer testing, Natural Source Zone Depletion (NSZD) study involving Helium tested air sampling and SF₆ soil diffusivity coefficient testing.

Hydrogeologist**January 2012 – May 2012**

Conestoga-Rovers & Associates, Midland, TX

Mapped crude spill sites, gauged monitor wells, hand bailed frac tanks, logged monitor well drilling, and processed analytical data into gradient maps, cross sections, spreadsheets, and reports.

Summer Intern**June 2010 – August 2010**

Bureau of Economic Geology, Austin, TX

Global Precipitation Chemistry Project, supervisors: Bridget Scanlon, Bob Reedy

Acquired data, mapped locations, outlined tasks, graphed isotope data, organized and filtered global precipitation samples, and reported on findings.

Student Technician**November 2007 – August 2008**

Bureau of Economic Geology, Austin, TX

GCCC Carbon Sequestration Project, supervisors: Ramón Treviño, Susan Havorka

Digitized oil well logs using PETRA, researched borehole data, prepared water analysis reports, and formatted chemical data for private land owners.
